6.4.10

Attach the following paragraph to the end of the presently given Remarks:

If the factor in addition to transmission of liquid is forecasted to be included in the loss of mass, the loss of mass, which is calculated by the value subtracting the loss of mass of the blank test carried out, may be regarded as the measured value.

6.5.1

Delete the following:

Remarks: If the factor in addition to transmission of liquid is forecasted to be included in the loss of mass, the loss of mass, which is calculated by the value subtracting the loss of mass of the blank test carried out, may be regarded as the measured value.
